## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

## DETAILED ACTION

### *Allowable Subject Matter*

Claims 42-45 and 47-61 are allowed.

### *Reasons for Allowance*

Claims 42-45 and 47-61 are allowed since there is no prior art of record that teaches or suggests a liquid crystal display comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claims:

Claim 42:

- a plurality second lines formed on a first substrate, intersecting a first signal lines, and including a plurality of curved portions
- a plurality of pixel electrodes located substantially in areas defined by the first and the second signal lines and including edges extending substantially parallel to the curved portions of the second lines
- a common electrode formed on a second substrate
- a region partitioning formed on at least one of the first and the second substrates and partitioning into a plurality of tilt regions by the region partitioning member, each tilt region including a pair of major edges parallel to the curved portions of the second signal lines

- wherein the distance between the major edges of each tilt region and the curved portions of the second signal lines is in a range between about 10 microns and about 30 microns

Claim 51:

- a data line formed on a semiconductor layer at least in part and including a curved portion and an intermediate portion crossing a gate line substantially at a right angle, at least on of the curved portions and the intermediate portions having a source electrode, wherein the intermediate portion extends from the curved portion at an angle with respect to the curved portion
- a pixel electrode formed on the first passivation layer, connected to the drain electrode, and having an edge extending substantially parallel to the curved portion of the data line
- a storage electrode line formed on a first substrate, extending substantially parallel to the gate line, and including a storage electrode, having an increased width with respect to a width of the storage electrode line, wherein the storage electrode has a quadrilateral shape and an edge of the storage electrode is inclined by an angle of about 45 degrees with respect to a lengthwise direction of the storage electrode line
- a common electrode formed on a second substrate
- a region partitioning member formed on at least one of the first and the second substrates and partitioning into a plurality of tilt regions by the region partitioning member

Claims 43-45 and 47-50 are allowed since they depend on the allowed claim 42.

Claims 52-61 are allowed since they depend on the allowed claim 51.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hattori et al (US 6597424) disclose an OCB liquid crystal display device comprising a pixel electrode provided with a protrusion at a periphery wherein the protrusion does not overlap with a signal electrode line and a gate electrode line.

Nakayoshi et al (US 6897930) disclose an IPS liquid crystal display device comprising a drain signal line having a curved portion; a pixel electrode and a common electrode both having edges substantially parallel to the curved portion of the drain signal line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
